We all know children who can't sit still, who never seem to listen, who don't follow instructions no matter how clearly you present them, or who blurt out inappropriate comments at inappropriate times. Sometimes these children are labeled as troublemakers or criticized for being lazy and undisciplined.

Unlock Their Potential for a Better Life...

Pinpoint The Issue.

They may be struggling with ADHD. Others may be silently coping with stress from tragic events or home life, suffering with a form of Post-Traumatic Stress Disorder. Many more may be overcome by the Autism epidemic.

There are Solutions.

Neurofeedback is a measured learning process that takes advantage of the brain's ability to self-regulate and seek balance. By re-training irregular brainwave patterns, we are assisting the brain to function better.

Neurofeedback is a more sophisticated cousin of biofeedback that specifically retrains the brain. The technique has been researched and closely studied for over 30 years. For more information visit our research tab at www.1HPSarasota.com.

A SCIENTIFICALLY VALIDATED, NON-DRUG, NON-INVASIVE THERAPY FOR EMOTIONAL LEARNING & STRESS-RELATED CONDITIONS.

It is our mission to help as many children as possible utilizing neurofeedback training.

Therefore, payment arrangements can be made for families in need, based on ability to pay.

If you require more information or would to set up a meeting, please call us at 941-552-4500 or apply online on our website at www.1HPSarasota.com.

WE ARE A REGISTERED FLORIDA VENDOR LISTED IN THE PORTAL AS 1 HEALTH PLACE, LLC.

Brain Map

A technician administers an EEG. You wear a cap that captures signals in the brain. You simply relax with your eyes open for 6 minutes, then 6 more minutes with your eyes closed while the computer collects a data map of your brain.

Analyze Results

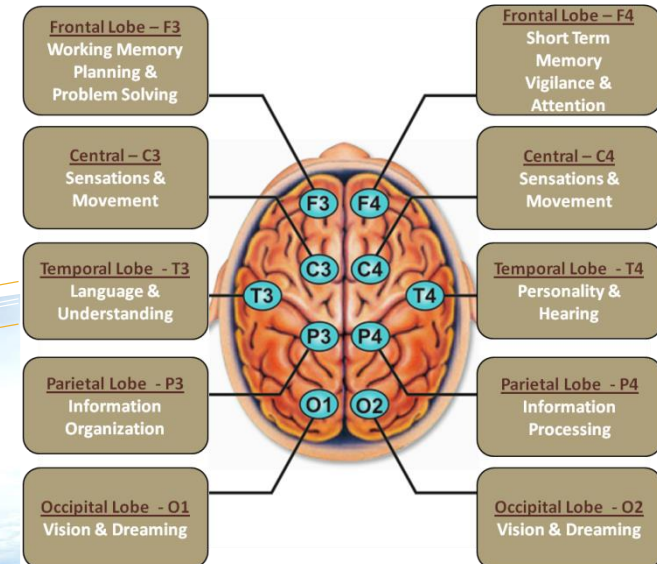

A report or Brain Map is generated containing a detailed analysis of the brain. The report also gives a detailed plan for retraining options.

Neurofeedback Training

Once a retraining plan is agreed upon, you will return to our office for scheduled neurofeedback training sessions. Training involves watching a movie or educational DVD while our software monitors your brainwaves in real time and adjusts the training.
